

BE SURE TO RASTERIZE YOUR TEMPLATE AT 300 DPI

If your final product requires printing to the edge, you must extend your artwork into the area marked bleed. Anything within the **bleed area** will be trimmed off.

Your type (or any important elements) should be within the **safety area**, which is 1/8th inch (.125 in) inside of the **trim line**.

Once you are finished with your artwork, remember to **delete this layer**, or it will be printed on your final product!

Copyworld will not be held responsible for reprinting your order if this occurs.
